

# Security Reconnaissance Report

**Target:** https://www.tokopedia.com

**Scan Date:** 2025-07-31 18:06:44

**Scan Duration:** 5.79 seconds

## CONFIDENTIAL SECURITY REPORT

This report contains sensitive security information. Handle with appropriate care and distribute only to authorized personnel.

## Executive Summary

The security reconnaissance scan of https://www.tokopedia.com identified 166 potential credential exposures and 13 API endpoints. **Critical:** 21 high-risk credentials were detected that require immediate attention.

## Scan Details

Parameter	Value
Target URL	https://www.tokopedia.com
Scan Status	Completed
Scan Duration	5.79 seconds
Scan Timestamp	2025-07-31 18:06:44 UTC

## Security Findings

## Recommendations

1. **Immediate Action Required:** Remove all exposed credentials from public-facing code and files.
2. **Credential Management:** Implement proper environment variable management for sensitive data.
3. **Code Review:** Establish code review processes to prevent credential exposure.
4. **Monitoring:** Implement automated scanning in CI/CD pipelines.
5. **Access Control:** Review and restrict access to sensitive API endpoints.
6. **Rotation:** Rotate all exposed credentials immediately.

## Appendix

### Scanning Methodology

This reconnaissance scan was performed using automated tools that analyze web pages and JavaScript files for exposed credentials and API endpoints. The scan includes pattern matching for common credential types including API keys, access tokens, and database credentials.

## Disclaimer

This report is generated by automated scanning tools and may contain false positives. Manual verification of findings is recommended. This scan is intended for authorized security testing purposes only.
